Education

SNDT Women's University

Bachelor of Science in Information Technology II
2026

G.D. Jalan College of Science and Commerce,
Mumbai

Intermediate – Science Stream | Year of Completion:
[2023]

Ideal School

Board - SSC

Grad May 2022

Skills

- Technical Skills:
HTML,CSS,Python,Core java,Flutter,Javascript,SQL
- Soft Skills:
Time Management , Detail-Oriented,Adaptable
- Tools & Platform:
Google WorkSpace , MicroSoft office , Trello
,Git&Github, JIRA, androidstudio, Eclipse,vs code

Language

- English
- Hindi

Interests

Web Development

Mobile Development

Data Science | Analysis| Machine Learning

Project

1.DailyDSA – Data Structures & Algorithms Practice Platform

- Developed a web application that helps students practice Data Structures and Algorithms problems daily.
- Implemented user authentication, progress tracking, and personalized learning features.
- Built using Next.js, React, Firebase, and Tailwind CSS.
- Designed an interactive dashboard to monitor problem-solving progress and learning streaks.
- GitHub: [JyotikaUppar/dailydsa](#)

2.Disease Prediction System | Machine Learning Project

- Developed a machine learning-based disease prediction system that predicts possible diseases based on user symptoms.
- Performed data preprocessing, feature selection, and model training using Python libraries such as Pandas, NumPy, and Scikit-learn.
- Evaluated and compared multiple classification algorithms to improve prediction accuracy.
- Implemented a user-friendly interface for symptom input and disease prediction.
- Technologies: Python, Machine Learning, Scikit-learn, Pandas, NumPy.
- GitHub: [DiseasePrediction Repository](#)
